

Grid Hunt 2.0 Submitted to the AppStore

Posted by admin - 13 Mar 2013 11:13

I'm pleased to announce that Grid Hunt vs 2.0 has been submitted to the Apple AppStore for approval. This new version has been completely rewritten giving it a new look and feel.

Included in the new features:

- Retina display support
- New GUI
- New grid design
- Game Center Leaderboard Support
- Ability to temporarily mark grid locations
- Improved help
- Added demo to help

Look for the new version in the AppStore soon.

I found a bug that required that I cancel the app submission. I've now corrected the problems (and added a few more features) and have now resubmitted Grid Hunt 2.0 for approval and release.
